Description

1 package eProductivity IS Enhancement
The Eprod system will undergo targeted enhancements to improve functionality and compliance. Key updates include integrating Business Information Sheet data into the Training Report module and aligning the Terminal Report format with ISO-enrolled standards. A new interface will enable direct input of Training Evaluation responses by firms and participants. All modifications will be compatible with existing infrastructure, supported by thorough testing and documentation. Technical support will also be provided to resolve issues with current system features.

Interested service provider must meet the following minimum requirements:
An enterprise owned by a Filipino citizen;
Shall provide a team with at least three (3) members who have a Bachelor's degree in Information System, Computer Science, Information Technology, or related fields;
Team leader should have at least five (5) years of technical experience in IT/IS System Development and Planning, and Project Execution, preferably with experience in leading a project on system development;
Team members must have at least three (3) years experience working as IS/IT personnel, or similar/related position in government or private sector; and
Familiar with NWPC systems or has handled a similar project in the past

1 package Human Resource IS Enhancement
The HRIS will be enhanced to align with the MSP process flow and improve overall functionality. Key upgrades include reorganizing the navigation menu, streamlining data entry and tracking for recruitment, training, and separation, and automating report generation for HR compliance. New features will be integrated, such as regional subsystems, uploading signed PDS, salary tables, and training effectiveness assessments. Salary data will be standardized in accordance with the Salary Standardization Law (SSL), and monitoring tools for documentary requirements and employee status will be strengthened. Technical support will be provided to address existing system issues.

Interested service provider must meet the following minimum requirements:
An enterprise owned by a Filipino citizen;
Shall provide a team with at least three (3) members who have a Bachelor's degree in Information System, Computer Science, Information Technology, or related fields;
Team leader should have at least five (5) years of technical experience in IT/IS System Development and Planning, and Project Execution, preferably with experience in leading a project on system development;
Team members must have at least three (3) years experience working as IS/IT personnel, or similar/related position in government or private sector; and
Familiar with NWPC systems or has handled a similar project in the past

1 package BFAR Development
The BFAR system development project encompasses end-to-end implementation from planning to deployment. It begins with gathering business requirements, identifying user roles, and defining compliance and security needs. The system and database design phase includes modeling user accounts, expenditure entities, and designing user-friendly interfaces for login, dashboards, and report generation. Development covers both frontend and backend components, including authentication, data entry, report generation, and export utilities (PDF/XLSX). Rigorous testing will be conducted-unit, integration, and user acceptance-to ensure accuracy and reliability. The system will be deployed to the cloud with provisions for data backup, recovery, and performance monitoring. Finally, user training and demonstration will be provided to ensure effective system adoption.

Interested service provider must meet the following minimum requirements:
An enterprise owned by a Filipino citizen;
Shall provide a team with at least three (3) members who have a Bachelor's degree in Information System, Computer Science, Information Technology, or related fields;
Team leader should have at least five (5) years of technical experience in IT/IS System Development and Planning, and Project Execution, preferably with experience in leading a project on system development;
Team members must have at least three (3) years experience working as IS/IT personnel, or similar/related position in government or private sector; and
Familiar with NWPC systems or has handled a similar project in the past
